THE BUZZ ON GREEN BUILDING

It seems to be everywhere. The "greening" of America has taken off over the past 5 years, starting with commercial buildings, and now in the residential market as a marketing advantage.

In fact, the McGraw-Hill 200 Construction Survey reported:

- Green seems to be the one area of construction insulated by the downturn.
- Green building has actually *grown* in spite of the market meltdown.
- Green construction increased from \$10 billion in 2005 to almost \$50 billion in 2008.
- By 2013, green construction could be valued at nearly \$150 billion.

Learn more about the biggest trend in the building and retrofit industry in a fast paced, interesting seminar from an industry expert who is in demand as a speaker.

This course is not approved for CE/PL credit by the Nevada Real Estate Commission. The Real Estate Commission neither approves nor endorses any of the forms used in this class with the exception of those prescribed by the State or Federal Law.
